Projects

eCommerce Web Application

- Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js), Redux, JWT, Stripe API
- Description:
- Developed a full-stack eCommerce web application that allows users to browse, search, and purchase products online. Integrated payment processing, user authentication, and a fully-featured product management system.

Student Onlilne Attendance Using MERN Stack

- An online attendance monitoring system is a software that store student attendance data. It can also record other data such as arrival times, leaves, and the length of absences. The system can store data for years and generate daily reports to help teachers track student attendance.

AI Chatbot Using ML and Python

- A chatbot to respond to questions and also convert sign language to text for dumb and deaf people.

Currently Working On

Brain Tumors Detection Using ML

- Developed a machine learning model to detect brain tumors from MRI images with high accuracy, leveraging Python and various deep learning frameworks.

Personal Assistant Using ML and Python

- A chatbot to respond to questions and also convert sign language to text for dumb and deaf people.

Educational Background

Rungta College of Engineering and Technology , Raipur Bachelor of Technology Nov 2021 - June 2025

- Specialization Computer Science and
- Engineering. CGPA - 8.62

St. Joseph's Hr. Sec School
Intermediate CGBSE March 2021 Relevant coursework in Physics, Chemistry, Maths, English and Hindi. Percentage - 94.2%

Skills
Languages

- Java(With DSA)
- Python
- Javascript
- HTML, CSS

Developer Tools

- Git and Github
- VS Code IntelliJ
- Postman

Technologies / Frameworks

- ReactJS
- Express Node
- REST APIs
- Machine Learning
- Data Science
- CNN(Beginner)

Databases and basic CSE topics

- MongoDB
- MySQL
- Computer Networks
- Operating System
- OOPS

Extra - Curricular Activities

Phoenix Hackfest Hackathon (Participation).
Participated in HackIndia Hackathon.
